Ready to Transform Your Operations?	32

TO OUR FUTURE CLIENTS,

In a world of constant digital change, the key to leadership isn't just adopting technology—it's harnessing it to solve your most complex challenges. The pressure to boost efficiency, reduce costs, and drive meaningful growth is immense.

AaladinAi was founded on a simple belief: technology should simplify, not complicate. As Bangladesh's first AI automation company, we are dedicated to building intelligent solutions that do just that.

This portfolio is not just about who we are; it's about what we can achieve together. Inside, you will see how we turn your operational complexities into clarity, automate the repetitive to unlock innovation, and deliver not just projects, but lasting partnerships built on measurable impact.

We are excited by the possibility of helping you thrive.

Sincerely,
The AaladinAI Team

Who We Are: Your Partner in Digital Transformation

“We Simplify Complexity, So You Can Focus on Growth.”

As the nation's pioneering force in AI automation, Aaladin AI stands at the forefront of a global shift towards intelligent enterprise. In today's dynamic market, where businesses face immense pressure to optimize operations and innovate at speed, generic digital tools are no longer sufficient. We bridge this gap by delivering sophisticated, bespoke technology solutions powered by artificial intelligence. Our core mission is to transform complexity into clarity and potential into performance. We partner with forward-thinking organizations to implement intelligent automation that streamlines workflows, enhances decision-making with data-driven insights, and creates new, frictionless customer experiences. By leveraging our deep expertise and an agile development approach, we ensure our solutions are not only cutting-edge but also deeply aligned with evolving business objectives and market demands.

At AaladinAI, we go beyond implementation to foster lasting impact. We are committed to building partnerships that drive measurable growth, strengthen resilience, and secure our clients' leadership in a fast-changing digital world.

Our Delivery Promise:

We prioritize not just what we deliver, but how we deliver it. Our agile approach is built on:

- **Adaptability:** Solutions that evolve with your needs.
- **Collaboration:** We act as an extension of your team.
- **Transparency:** Open communication from start to finish.

Mission and Vision

Mission

Our mission is to help businesses of every sector boost performance through tailored tech solutions. We automate repetitive tasks so organizations can focus on growth and innovation. With a blend of consultancy and customized AI tools, we turn complexity into clarity, enabling firms to spend more time on the work that truly drives success.

Vision

As the nation's first AI automation company, our vision is to deliver high quality technology services and products that set us apart as an industry leader. We strive to drive productivity to its peak by zero hundred percent AI automation, helping businesses across sectors work smarter and more effectively.

Our Approach: A Partnership for Impact

We move beyond the "project" mindset to a "partnership" model, ensuring continuous value and support.

Discover & Define

Deep-dive workshops to understand your unique challenges, goals, and opportunities.

Strategize & Propose

Co-creating a tailored solution blueprint with clear KPIs and a defined roadmap.

Build & Integrate

Agile development of your solution, with iterative feedback and seamless integration.

Execute & Support

Launching your solution and providing continuous support, optimization, and training.

Driving Efficiency and Innovation Across Sectors

Our Dual-Engine Model: Tailored Solutions for Every Scale

AaladinAI is built on a unique, dual-engine model designed to fuel innovation at every level. This structure allows us to pioneer accessible AI tools for individuals while simultaneously developing deep, enterprise-grade partnerships.

Powering Individual Productivity

We deliver immediate value directly to users via subscription and freemium plans. This arm of our business acts as a dynamic R&D lab, constantly refining the core AI technologies that also power our advanced enterprise solutions.

B2B: Partnering for Enterprise Transformation

This is the heart of our partnership with you. We move beyond one-off projects to become a strategic extension of your team. Our engagement models are designed for flexibility and long-term impact, including:

- **Subscription & Licensing:** For ongoing access to our flagship SaaS platforms.
- **Project-Based Fees:** For custom-built solutions and integrations.
- **Long-Term Service Agreements:** For continuous optimization, support, and co-innovation.

We serve a diverse range of industries, including Service, Manufacturing, Software & IT, and Healthcare.

Solution	Key Benefit	Ideal For
Workflow Automation SaaS	Automate repetitive processes, target 50-95%+ efficiency gains.	Operations, HR, Finance teams.
Customized COPs (AI Agents)	Tailored AI assistants for specific departmental tasks.	Customer Service, Data Analysis, IT Support.
Predictive Analytics SaaS	Forecast trends and outcomes with 95-98.5% model accuracy.	Strategy, Marketing, Supply Chain.
Custom Software & AI	Bespoke solutions built to solve your unique, complex challenges.	R&D, Specialized Operational Needs.

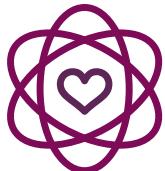

Our Product Portfolio: Intelligent Solutions for a Digital Frontier

Our offerings are built on a dual-engine development strategy, ensuring both groundbreaking innovation and bespoke client success.

Fundamental Projects: Pioneering solutions born from our dedicated R&D, designed to set new industry standards.

Incremental Projects: Custom-tailored systems built in partnership with clients to solve their most specific and critical challenges.

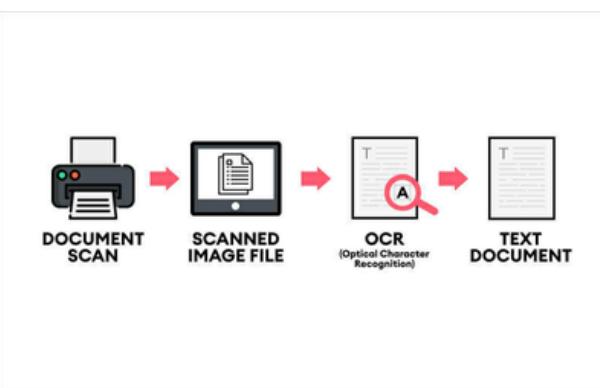

Fundamental Projects: The Pillars of Innovation

Core AI Technologies & Platforms (Ongoing)

Aaladin OCR Engine

An enterprise-grade document digitization system that transforms printed materials into structured, searchable data. It delivers unparalleled accuracy in recognizing complex layouts, Bangla and English text, mathematical equations, and diagrams, intelligently classifying content for instant retrieval and editing. This technology is the foundation for creating centralized digital archives, slashing administrative overhead and unlocking the value of legacy information.

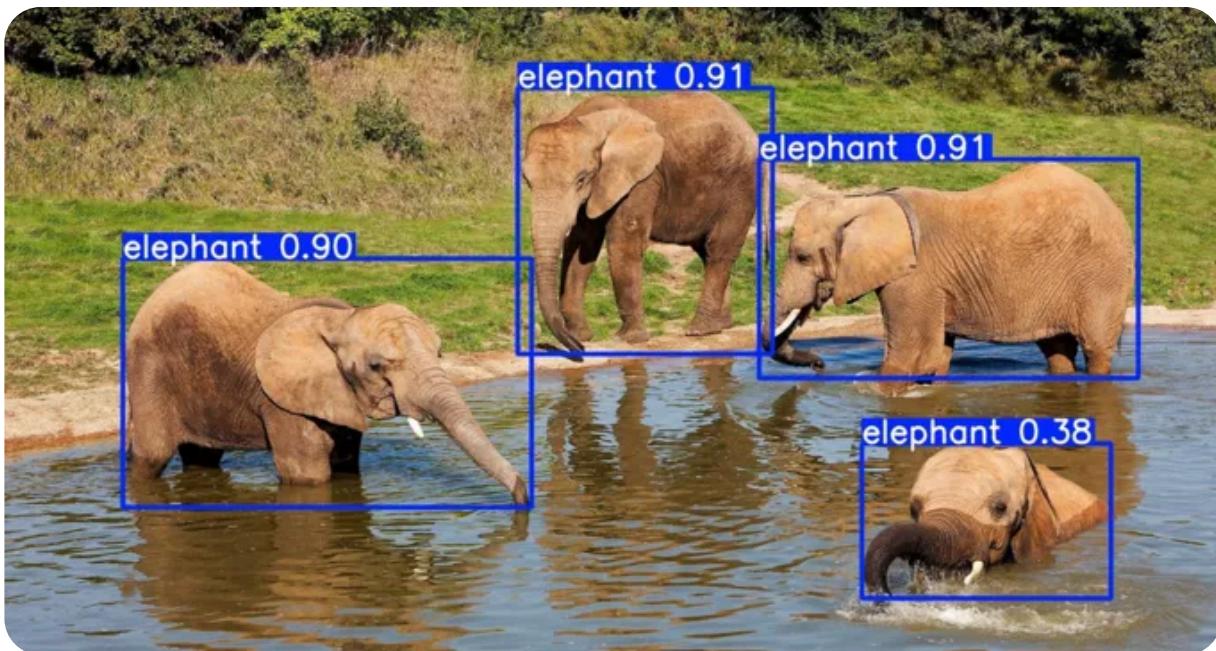

Proprietary Small Language Model (SLM)

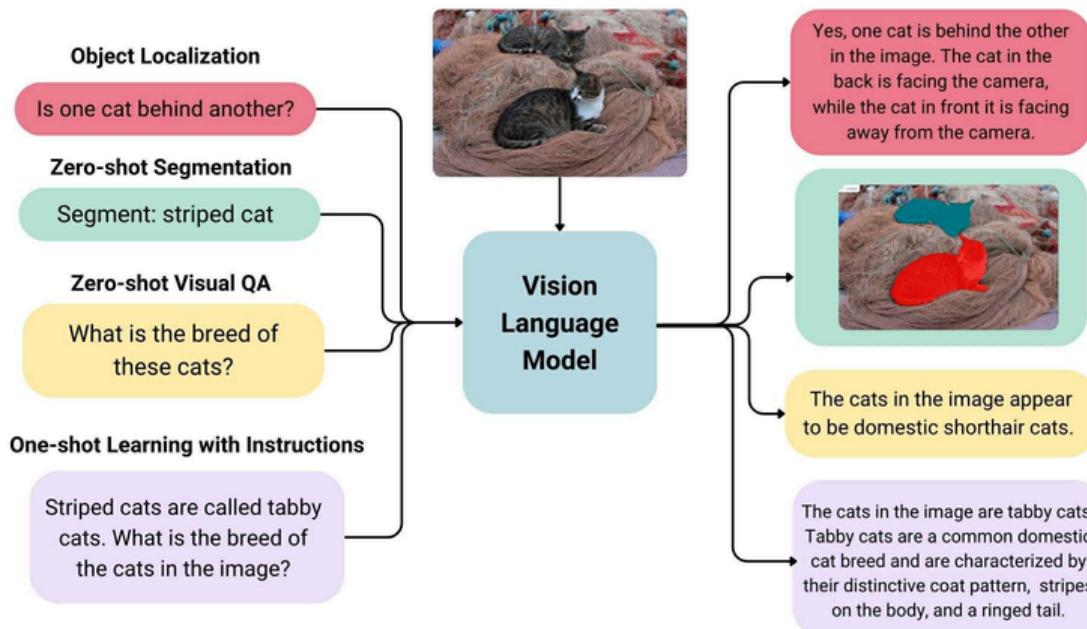

We are pioneering the next generation of efficient AI with our proprietary Small Language Model. Built on a custom AI algorithm, our SLM is engineered for superior performance and lower computational cost than existing models, ensuring faster, more cost-effective, and domain-specific intelligence for our enterprise solutions.

Vision Language Model (VLM)

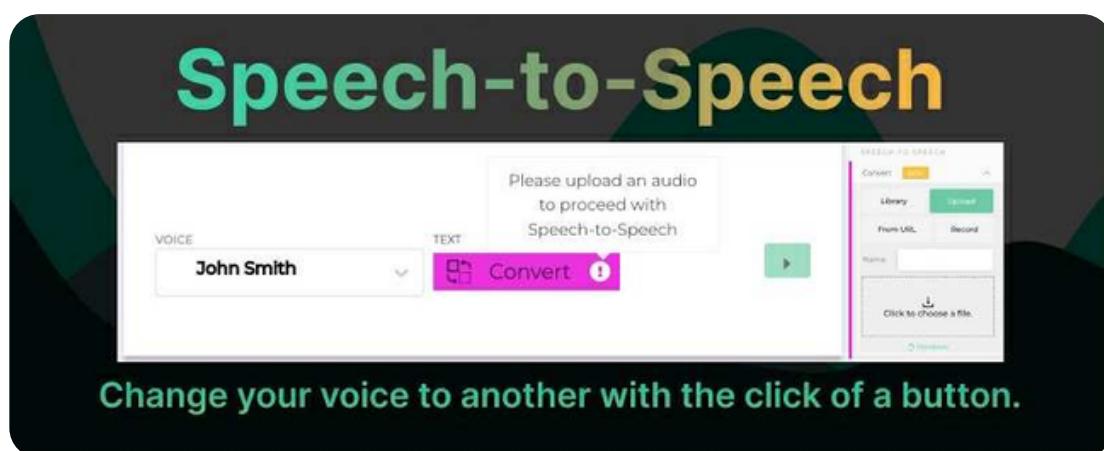

Our advanced Vision Language Model bridges the gap between visual data and language understanding. This multimodal AI can analyze images, interpret scenes, and generate insightful text-based responses, powering applications in automated quality control, intelligent content moderation, and enhanced data extraction and interpretation.

Bangla Voice AI (STS)

A state-of-the-art, Bangla-focused conversational IVR system that humanizes customer interaction. Leveraging advanced speech-to-text, natural language understanding, and text-to-speech, it enables natural, human-like voice interactions for customer support, billing, and order tracking. Deployable via API, it offers businesses a scalable, 24/7 automation solution that reduces operational costs while dramatically improving customer experience and opening new revenue channels.

SaaS Platform Suite

Accounts AI: Autonomous Financial Intelligence

Move beyond basic accounting software to a truly intelligent financial partner. Accounts AI is an end-to-end, AI-driven platform that transforms your finance function from a cost center into a strategic asset. We deliver complete automation, from transaction coding to predictive forecasting, empowering your leadership with real-time, actionable financial intelligence.

Core Service Pillars:

1. Intelligent Transaction Processing:

- Automated Journal Entries: Our AI seamlessly codes expenses, reconciles bank statements, and generates complex journal entries with human-like understanding, eliminating manual data entry.
- Multi-Source Data Integration: Connects to your banking feeds, payment gateways, ERP, and CRM systems to create a single source of financial truth.
- Anomaly & Fraud Detection: Continuously monitors all transactions in real-time to flag discrepancies, duplicate payments, and potentially fraudulent activity for immediate review.

2. Real-Time Reporting & Advanced Visualization:

- Dynamic Financial Dashboards: Access your P&L, Balance Sheet, and Cash Flow Statement in real-time through executive-level dashboards that update instantly.
- Automated Report Generation: Generate compliant financial statements, management reports, and auditor-ready packages on-demand with a single click.
- Customizable KPI Tracking: Monitor the exact metrics that matter to your business, from departmental burn rates to customer lifetime value.

3. Predictive Analytics & Strategic Forecasting:

- AI-Powered Cash Flow Forecasting: Leverage historical data and market trends to predict future cash flow scenarios with stunning accuracy, allowing for proactive treasury management.
- Revenue & Expense Prediction: Forecast future revenue and identify potential budget variances before they occur, enabling data-driven strategic adjustments.
- Scenario Modeling: Simulate the financial impact of business decisions, such as market expansion or new hiring, to guide strategy with confidence.

TrackIO: Intelligent Transportation Ecosystem

An AI-powered platform that brings full transparency and accountability to public transit. TrackIO provides real-time vehicle tracking, passenger analytics, and fuel usage monitoring to detect route deviations and overloading. It empowers governments and transport committees with data-driven insights to optimize urban mobility, enhance passenger safety, and promote ethical transportation services.

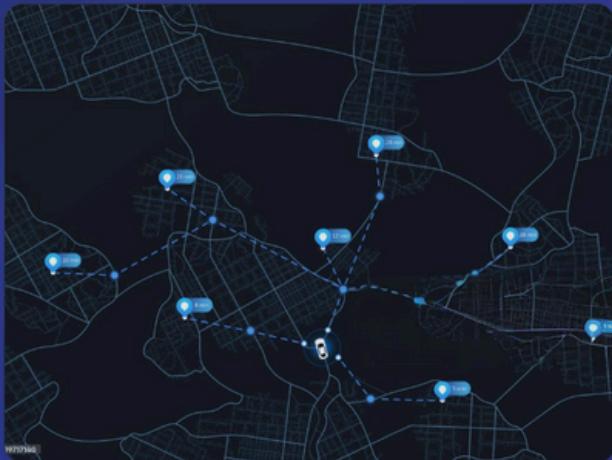

Powered by Aaladin AI

AI-Powered Vehicle Monitoring

Track. Analyze. Improve.

Trackio.ai revolutionizes transportation monitoring with real-time vehicle tracking, passenger counting, and unethical behavior detection—creating transparency for governments, bus committees, and citizens.

The Third Eye: Unified Business Intelligence

A comprehensive AI-powered BI platform that unifies all operational data into a single source of truth. It allows executives to search, analyze, and understand every aspect of their business through natural language queries and interactive dashboards. With machine-agnostic data ingestion and role-based access, it delivers actionable insights to drive growth and efficiency across all departments.

Search Anything
Business Intelligence

Search Anything. See Everything.

AI-powered business intelligence that lets you search, analyze, and understand every aspect of your company through one intelligent dashboard.

Search Your Business Data

Ask for comprehensive business insights... (e.g., 'Analyze our revenue performance and identify growth opportunities')

Search

Try these example searches:

"Analyze our revenue performance and identify growth opportunities" "Which products need immediate attention and why?"

"How are our departments performing against targets?" "What's our overall business health and key metrics?"

"Compare our financial performance across different periods"

Timeframe: Week Month Year

Aaladin CRM: AI-Driven Customer Relationship Management

Our intelligent CRM centralizes all customer interactions, automating follow-ups and lead tracking. It delivers real-time analytics and actionable insights to boost sales conversion and enhance customer satisfaction. Designed for scalability, it grows with your business, ensuring every customer touchpoint is optimized for success.

Project Manager AI: Predictive Project Leadership

An intelligent platform that augments project management with predictive analytics. It automates task assignments, monitors progress in real-time, and forecasts potential delays, enabling data-driven decisions for on-time, on-budget project delivery. It ensures teams remain aligned, productive, and proactive.

Health AI: Clinical Workflow Intelligence

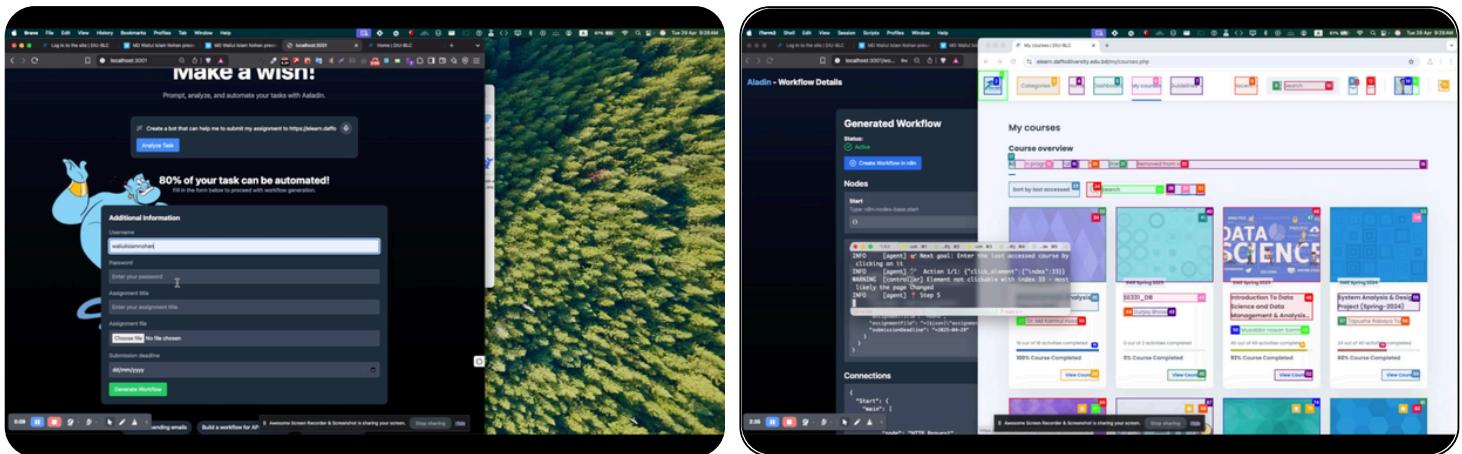

A bilingual (Bangla–English) speech-to-text solution that revolutionizes clinical documentation. It enables clinicians to generate structured, FHIR-compliant e-prescriptions from voice dictation, with intelligent autocomplete from drug catalogs. Supporting “Banglish” input and symptom triage, it reduces prescription errors and cuts documentation time, making workflows faster and safer while ensuring local compliance.

AI Fabricator: No-Code Enterprise Automation

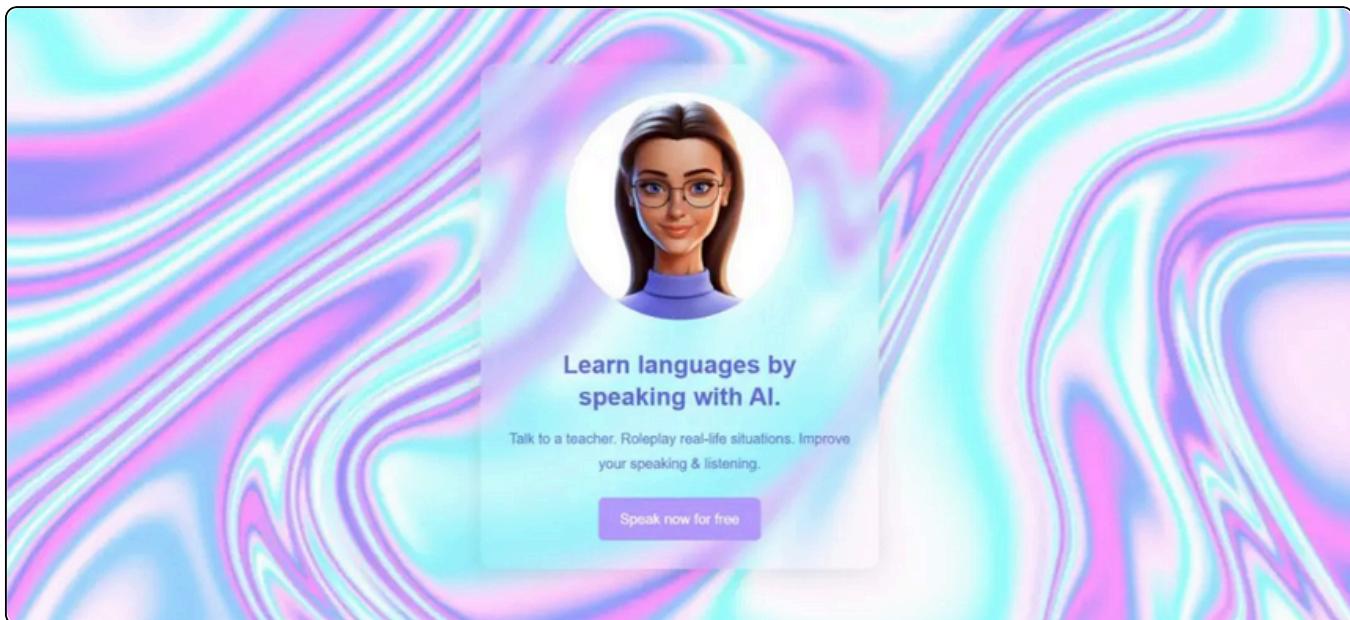

A visionary platform that empowers businesses to build and deploy sophisticated AI agents—without writing code. Through an intuitive drag-and-drop interface, users can connect tools, APIs, and AI models to automate complex tasks and customer workflows. It democratizes AI, allowing any team to create autonomous systems that enhance productivity and drive innovation.

EnglishMate: AI-Powered Language Acquisition

An immersive voice-based tutor that accelerates English fluency. Through real-time, interactive sessions, it provides instant speech recognition, grammar correction, and personalized feedback. This mobile-friendly platform offers a scalable, engaging way for a workforce to build critical communication skills for global business.

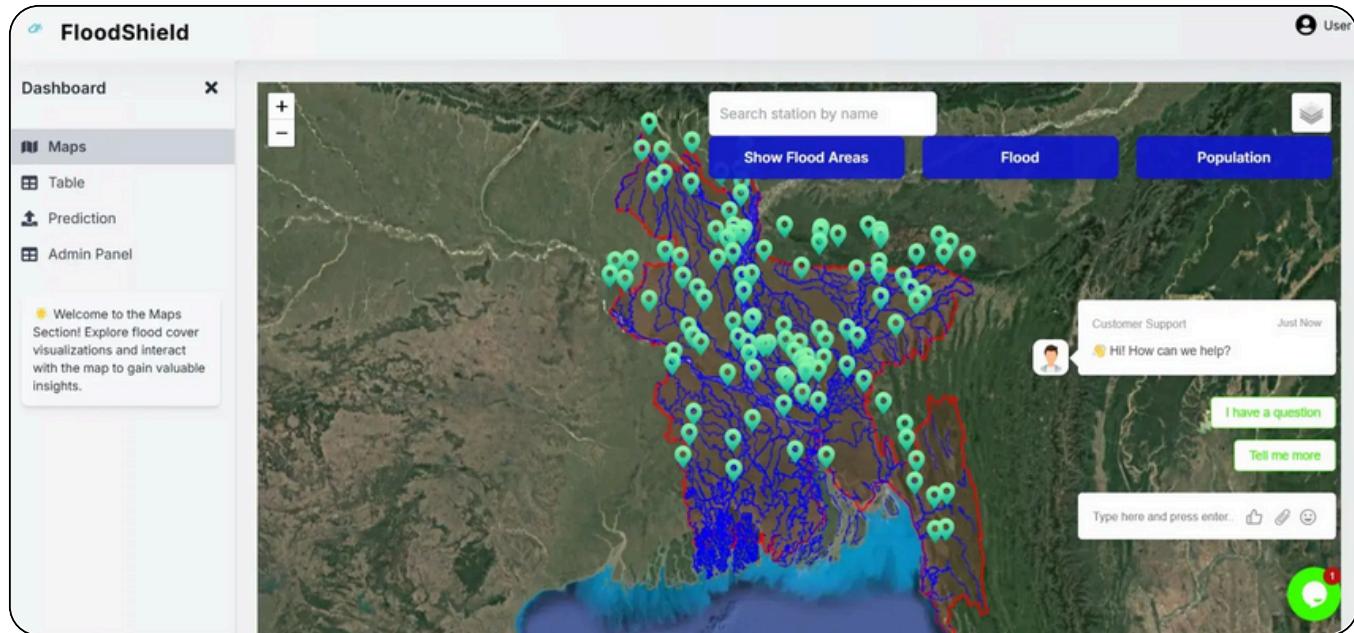

Monitor AI: Engagement Intelligence for Education

A platform that brings transparency and insight to virtual learning. Monitor AI uses AI to track student engagement, provide real-time attention alerts to teachers, and deliver simplified progress dashboards to parents. This creates a smarter, safer, and more accountable online educational environment for all stakeholders.

Flood Shield: Proactive Climate Resilience Platform

An AI-driven flood prediction system that safeguards communities. By integrating NASA satellite data and BWDB water level metrics, it delivers accurate, timely forecasts via an interactive flood map and an AI chatbot. This empowers researchers and vulnerable populations with the insights needed for proactive decision-making and disaster preparedness.

Site Genie: Conceptual Website Realization

Transforms a simple idea into a professional online presence in minutes. Users describe their vision, and Site Genie intelligently generates a fully functional, responsive, and content-rich website. It eliminates technical barriers, enabling entrepreneurs and creators to launch with speed and confidence.

The screenshot shows the SiteGenie homepage. At the top, there's a navigation bar with the SiteGenie logo, 'Features', 'How It Works', 'Pricing', 'Log In', and a yellow 'Get Started' button. The main headline reads 'Turn your ideas into beautiful websites in seconds'. Below it, a sub-headline says 'Describe your website needs and SiteGenie will match you with the perfect template and generate tailored content for your brand.' There's a text input field with placeholder text 'Describe your website (e.g., "A modern e-commerce site for selling handmade jewelry")' and a yellow 'Make a Wish' button with a magic wand icon. At the bottom, there's a small illustration of a genie lamp with the text 'Rub the lamp for magic' and a small 'N' icon in a red circle.

Justice AI: Empowering Legal Access & Action

An empathetic AI legal assistant that demystifies complex laws. By analyzing user input, it provides instant, location-based legal guidance and direct connections to verified helplines and emergency services. This platform empowers victims of harassment, fraud, and injustice to understand their rights and take confident, swift action.

Powered by Aaladin AI

Justice AI

Understand the law. Know your rights. Take action.

Facing a crime or legal situation? Justice AI helps you understand the laws that apply and guides you through the right actions to take—whether it's harassment, fraud, theft, or any injustice.

HalalGPT: Scholar-Verified Islamic Knowledge Platform

A secure, AI-powered resource providing a global Muslim community with authentic, verified Islamic knowledge. The platform, via its chatbot Huda 2.0, offers personalized guidance with Quranic and Hadith references, tafsir exploration, and prayer tools. Its multilingual, intuitive interface ensures trusted knowledge is accessible and secure for users worldwide.

Incremental Projects: Tailored Excellence

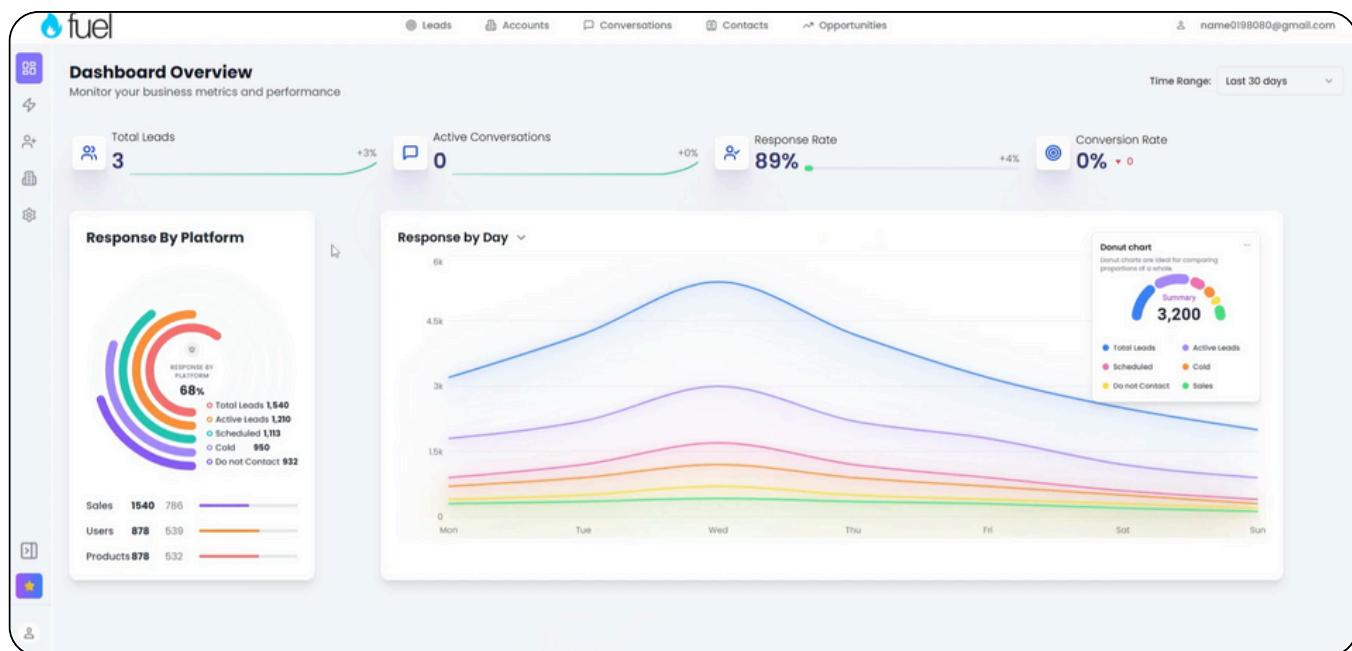

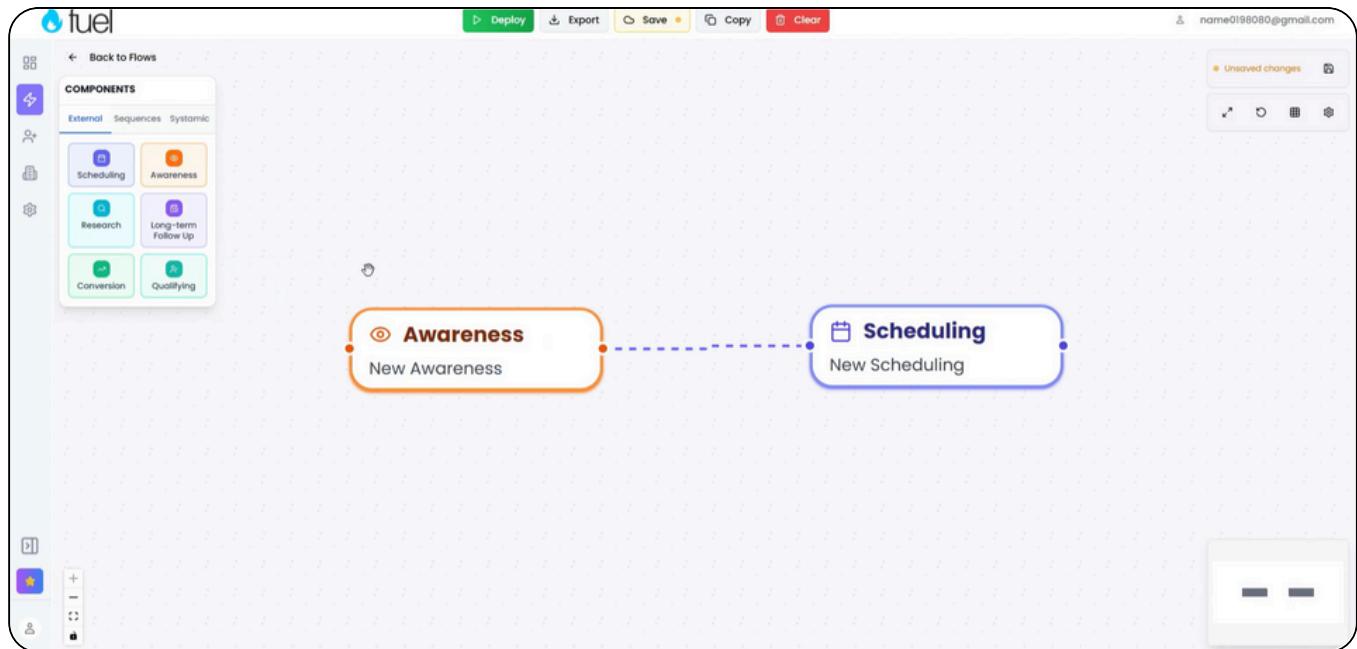

Core AI Technologies & Platforms (Ongoing)

These projects exemplify our ability to partner with clients and deliver bespoke solutions that drive their unique business objectives.

AI Sales CRM for Fuel AI

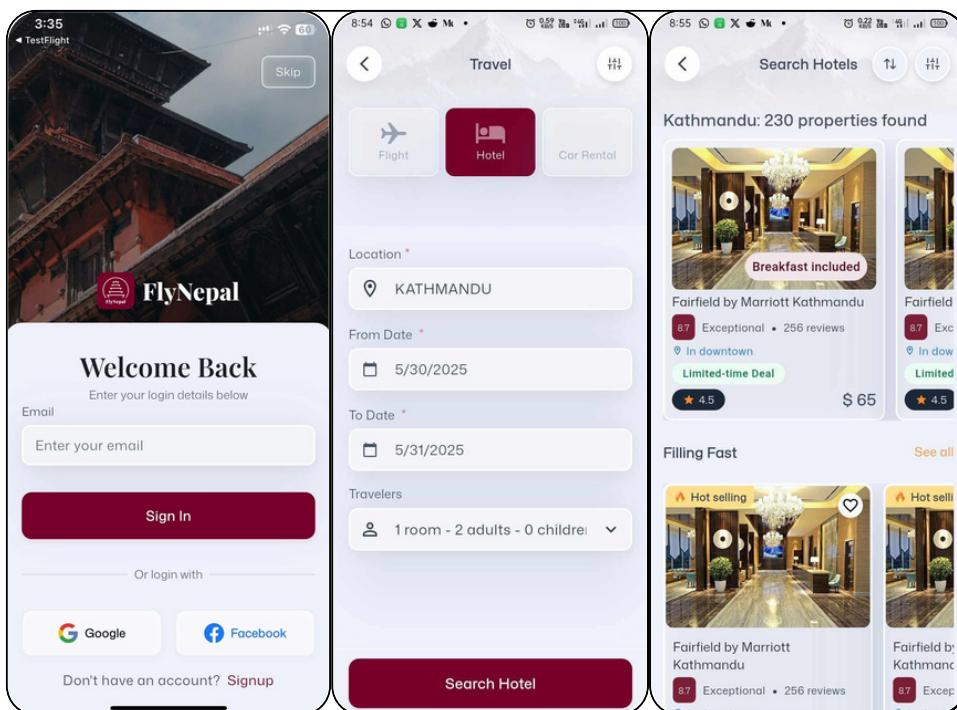

A custom automation engine that orchestrates lead generation from multiple social platforms and automates customer engagement with human-like AI agents. It streamlines the entire sales workflow, driving efficiency and increasing conversion rates through personalized, scalable communication.

Travel App for Fly Nepal

A comprehensive travel ecosystem that consolidates flight, hotel, bus, and tour booking into a single, seamless experience. Featuring personalized packages, real-time price comparison, and multiple payment options, it simplifies travel planning and enhances customer accessibility with 24/7 support.

AI Business Launchpad for Project Scale Built

An all-in-one entrepreneurial engine that transforms a business idea into a ready-to-launch brand within minutes. By leveraging multiple AI models, it instantly generates logos, names, pitch decks, websites, and marketing assets, empowering startups to accelerate their go-to-market strategy without a large team.

The screenshot shows the Aladdin AI platform's user interface. At the top center is a large, colorful infinity symbol icon. Below it, the text "How may I assist you?" is displayed. A subtext below reads: "I'm here to assist with anything related to business whether it's strategy, branding, marketing, documents, or launching your idea. Just ask your question, and I'll guide you with the best possible answer." To the left is a vertical sidebar with various icons representing different AI tools. In the center is a large input field with the placeholder "Ask me anything". To the right of the input field are buttons for "Attach" and an upward arrow. Below the input field are six rectangular buttons, each representing an AI agent: "Logo Agent", "Business Name Agent", "Pitch Deck Agent", "Document Agent", "Video Agent", and "Website Agent".

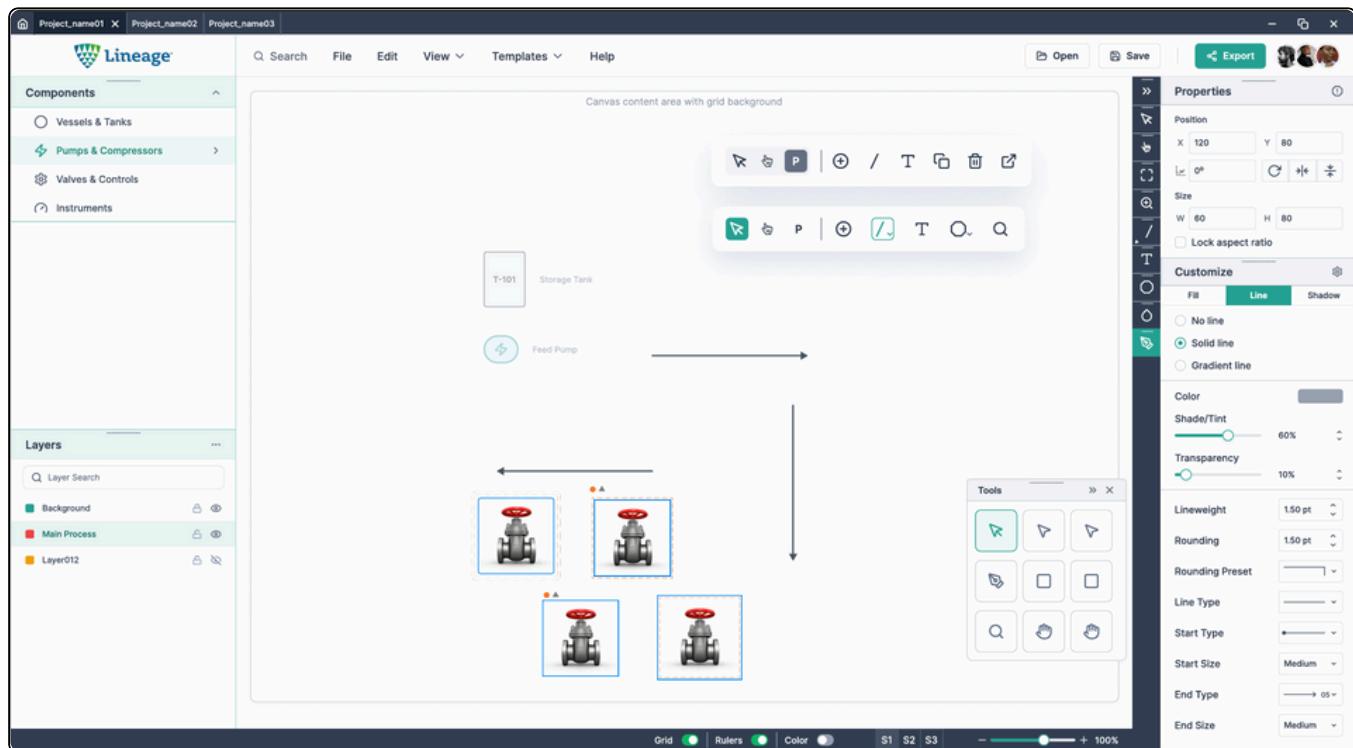

The screenshot shows the "Video Generate" feature of the Hyper Scale AI platform. On the left is a sidebar with navigation links like "Search", "Overview", "AI Tools", "Logo Generate", "Business Name", "Pitch Deck", "Document", "Video Generate", "Website Generate", "General", "Subscriptions", "Refer & Earn", "Favourite", "Setting", and "FAQ". The main area displays a video thumbnail of a Minion character. The text "Your AI-Generated Video is Ready!" is shown above the thumbnail. Below the thumbnail is a button labeled "Download Video". At the bottom is a purple "Generate Again" button.

The screenshot shows the "Logo Generate" feature of the Hyper Scale AI platform. On the left is a sidebar with navigation links like "Search", "Overview", "AI Tools", "Logo Generate", "Business Name", "Pitch Deck", "Document", "Video Generate", "Website Generate", "General", "Subscriptions", "Refer & Earn", "Favourite", "Setting", and "FAQ". The main area has a heading "Create Your Perfect Logo Instantly with AI" and sub-sections for "Business Name" (with a text input field), "Describe Your Logo" (with a text input field), "Select Color Palette" (with a color palette tool), and "Select Your Preferred Style" (with four categories: "Modern Mascot Logo", "Black & White Line Logo", "Vintage Logo", and "Cartoon Logo"). At the bottom is a purple "Generate Logo" button.

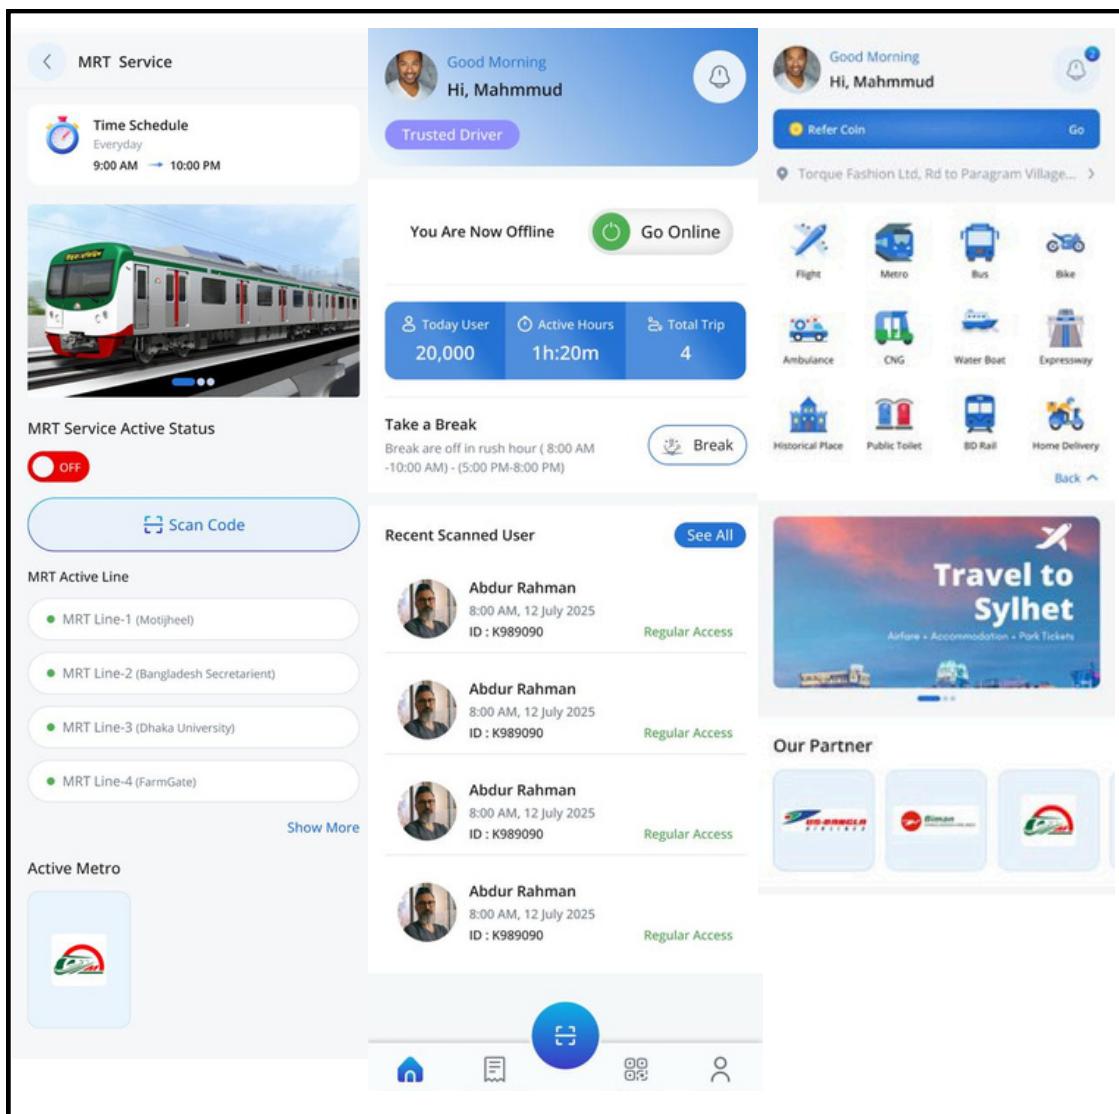

Productivity AI for Linage

A smart design and visualization tool that enables the effortless creation of architecture plans, flowcharts, and complex diagrams. Its intuitive, collaborative interface enhances planning accuracy and boosts organizational productivity for teams and individuals.

City Pass: Unified Mobility Solution

A visionary transportation platform that consolidates all modes of travel—from bikes to planes—into a single, cashless mobile pass. It simplifies commuting and long-distance travel, making urban and inter-city movement more convenient, affordable, and accessible for everyone.

Enterprise-Grade Business Systems

We have designed and deployed robust, scalable websites and digital platforms for leading firms, including Gadgets All, Roshan Transport, Caspian Life, Vector Power, and Salesman Tracker, enhancing their digital footprint and operational reach.

Digital SOP Management Platform

Software that digitizes and enforces standard operating procedures across your organization. It ensures process consistency, reduces errors, improves compliance, and maintains quality control through real-time tracking and automation.

Intelligent ERP System

A unified business management platform that integrates finance, HR, inventory, and production with AI and cloud automation. It provides complete operational visibility and control, empowering data-driven decisions that boost productivity and fuel sustainable growth.

MediGuru: AI-Mediated Exam Preparation

A specialized educational platform for medical and dental aspirants in Bangladesh. It offers personalized mock tests, routine-based exams, and an AI mentor to track progress, consolidating all learning tools into a single dashboard for efficient and effective exam preparation.

MediGuru

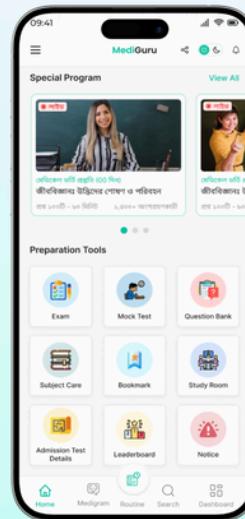

মেডিকেল ও ডেন্টাল ভর্তি পরীক্ষার স্মার্ট প্রস্তুতি

PurePic: SME Commerce Intelligence

A smart grocery and inventory management platform designed for small and medium enterprises. It provides real-time stock updates, automated restocking alerts, and digital storefronts, helping vendors manage operations, accept online payments, and grow their business with AI-powered insights.

Our Featured Clients

Our Commitment to Excellence:

A Glimpse at 2025–26

Q1 2026: Foundation & Market Leadership

Strategic Pillar: Establish Sovereign Dominance and Operationalize Excellence

- **Product Milestone:** Successful market launch of our flagship Workflow Automation SaaS MVP and Customized Cognitive Automation Platforms, delivering a minimum of 20% operational efficiency for our inaugural enterprise partners.
- **Infrastructure & R&D:** Inauguration of Bangladesh's premier Quantum Processing Server and DeepTech Facility, establishing a national epicenter for advanced AI research and development.
- **Commercial Traction:** Secure ten (10+) new enterprise pilot contracts, validating our market fit and value proposition with leading Bangladeshi corporations.
- **Ecosystem Development:** Forge foundational strategic partnerships within Bangladesh and key international markets (e.g., Australia), while launching a university hackathon series to cultivate the nation's next generation of AI talent.
- **Brand Objective:** Solidify our market position under the banner "Intelligent Automation, Engineered for Business Success," initiating a multi-channel campaign to dominate the domestic narrative.

Q2 2026: Acceleration & Global Entry

Strategic Pillar: Demonstrate Unrivaled Precision and Expand Our Footprint

- **Product Milestone:** Launch of our Predictive Analytics SaaS MVP, achieving and maintaining a demonstrable model accuracy of 95–98.5% across all client deployments.
- **Global Expansion:** Execute our first international client pilot in the Australian market, a critical milestone in our strategic global entry plan.
- **Commercial Ambition:** Onboard over twenty (20+) medium-to-large-scale enterprises, driving a projected 400%+ Year-Over-Year profit surge.
- **Strategic Alliances:** Formalize deep integration partnerships with major ERP providers and global consulting firms, embedding AaladinAi solutions into the core of enterprise ecosystems.
- **Trust & Assurance:** Commence the formal ISO/IEC 27001 certification process, underscoring our uncompromising commitment to world-class data security and operational integrity.

Q3 2026: Validation & Strategic Scale

Strategic Pillar: Cement Authority with Demonstrable Enterprise Impact

- **Client Impact:** Publicly release performance analytics demonstrating an average of 30%+ cost savings for our enterprise partners, transforming our claims into irrefutable evidence.
- **Market Authority:** Publish and disseminate a definitive industry whitepaper on AI-driven efficiency, establishing AaladinAi as the thought leader in the region.
- **Commercial Expansion:** Expand our enterprise portfolio to 25+ major Bangladeshi clients, including a landmark contract in support of the national Digital Bangladesh vision.
- **Talent & Culture:** Scale our elite R&D team to over 50 engineers and data scientists, implementing robust retention programs to ensure an 85%+ employee loyalty rate.
- **Client Advocacy:** Launch a targeted C-suite engagement campaign, achieving a world-class Net Promoter Score (NPS) of 70+ as a testament to unparalleled client satisfaction.

Dominance & Legacy Building

- **Portfolio Revolution:** Execute a major portfolio relaunch, unveiling next-generation products including WebGenie, EnglishMate, and enhanced Workflow & Predictive Analytics suites.
- **Innovation Leadership:** File two (2) groundbreaking AI patents and achieve ISO/IEC 27001 certification, formalizing our technological and operational supremacy.
- **Global Campaign:** Launch our international brand campaign under the powerful banner: "AI Automation That Pays for Itself."
- **Market Consolidation:** Host the inaugural AaladinAi Client Summit in Dhaka, showcasing powerful testimonials and cementing our community of industry leaders. We will close the year serving 30+ enterprise clients in Bangladesh and 10+ international pilots.
- **Social Responsibility:** Advance our CSR mission by championing "reverse brain drain" initiatives and implementing green IT practices to reduce our corporate carbon footprint by 5%.

Your Strategic Advantage

Pioneering Expertise: The first-mover advantage in Bangladesh's AI landscape.

Tailored, Not Templated: We build solutions for your specific problems, not ours.

Agile Partnership: A collaborative process that adapts to your pace and needs.

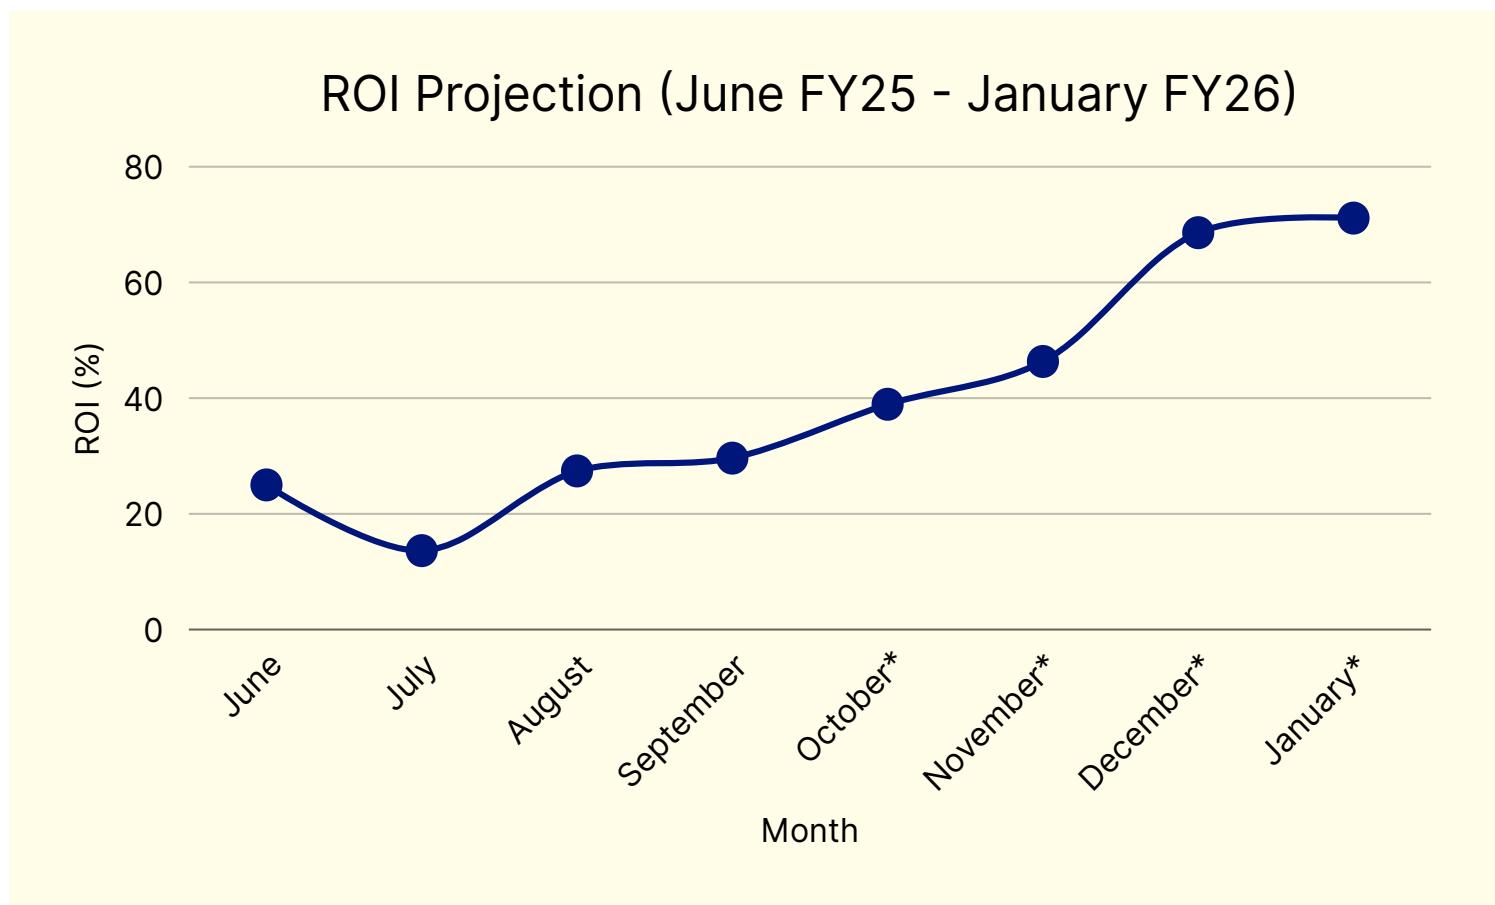

Measurable ROI: We are obsessed with delivering clear, quantifiable value.

Future-Proof Foundation: Our R&D, including Bangladesh's first Quantum Processing Server, ensures you work with cutting-edge technology.

Financial Projections (Overview)

ROI Projection: June 2025 – January 2026
